## **1385.0.55.001 - Emergency Management Information Development Plan Matrix, 2006**

Latest ISSUE Released at 11:30 AM (CANBERRA TIME) 31/10/2006 First Issue

---

## Summary

### About this Release

The Emergency Management Information Development Plan Matrix is a complex data needs analysis of the emergency management sector which underpins the EMIDP. For each of the five domains of emergency management (Risk Assessment, Risk Reduction, Readiness, Response, {Impact and} Recovery), the matrix provides information on the characteristics of the data needs and development requirements. It contains information on existing data and data gaps and their data characteristics, cross-classified by the environmental characteristics, the hazard or risk types and the business processes that constitute the different organisational and operational procedures within the service agencies.
